

Muhannad Alfawzan

Computer Science Graduate | AI, Data, and Software Engineering

mohanad.alfawzan1@gmail.com | +966 56 998 2686 | LinkedIn | GitHub | Riyadh, Saudi Arabia

Summary

Computer Science graduate with a 4.96/5 GPA and hands-on experience across software development, artificial intelligence, data analysis, and business intelligence. Built and deployed production applications, developed machine learning projects, and created analytical dashboards using Power BI and SQL. Competitively selected for KAUST Academy AI programs and comfortable learning quickly in engineering, data, and product-focused environments.

Education

Qassim University

B.Sc. Computer Science, GPA **4.96 / 5.00**

Buraydah, Saudi Arabia

2021 - 2026

- Academic Excellence Award for five consecutive years (2022-2026)

KAUST Academy

Advanced Artificial Intelligence Program

2026

- Completed advanced training in machine learning, deep learning, computer vision, NLP, LLMs, reinforcement learning, and agentic AI systems

Experience

Business Intelligence Trainee, Ejada Systems

Remote / Riyadh

06/2025 - 08/2025

- Extracted, cleaned, and analyzed structured business data to build a **5-page interactive Power BI dashboard**
- Designed KPI tracking, trend analysis, and visual reporting to support business decision-making
- Applied data analysis, dashboard design, and stakeholder-focused reporting practices in a professional BI environment

Technical Consultant, Quran Memorization Association

Buraydah

08/2024 - 06/2025

- Automated operational reporting workflows using Coda and Google Sheets, reducing manual effort by **30%**
- Improved data organization and reporting visibility for administrative teams

Projects

Nawah - AI-Powered Family Organization Platform

Graduation Project | Flutter, Firebase, Gemini AI

- Led architecture and development within a 5-person team; shipped the application to the App Store and Google Play
- Built real-time messaging, shared calendars, task management, and AI-assisted family organization features
- Delivered an Arabic-first production mobile application with cloud backend services and real user workflows

Al-Fawzan Family Platform

Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Built a full-stack web platform for a licensed Saudi family foundation covering family tree visualization, welfare applications, hall booking, event management, and document management
- Implemented role-based access control, database policies, QR-based flows, and a multi-role admin dashboard

CNN Image Classification

Python, TensorFlow, Keras

- Trained and evaluated convolutional neural network models using preprocessing, model training, validation, and performance evaluation workflows

Technical Skills

Programming: Python, SQL, JavaScript, TypeScript, Java, Dart, C++

AI and Data: Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, PyTorch, Scikit-learn, Pandas

Software Development: Next.js, React, Flutter, Firebase, Supabase, PostgreSQL, Git/GitHub, REST APIs, Vercel

BI and Tools: Power BI, Excel, Data Visualization, Dashboarding, Cloud Functions, PostHog

Core Strengths

Problem-Solving, Fast Learning, Team Leadership, Attention to Detail, Analytical Thinking, Adaptability

Languages

Arabic (Native), English (Professional)
